Print Books & E-Books

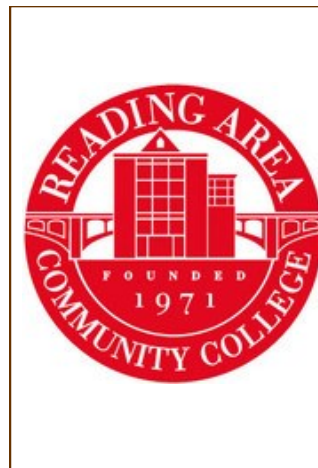

The Yocum Library has hundreds of print books on health and nursing subjects that you can check out of the library. If you want to browse the collection on floor 3 the call numbers range from R through RZ with titles on the history of the nursing profession in RT.

In order to keep the book collection up-to-date, librarians evaluate the collection annually and remove titles that are more than five years old unless the titles are classic works or the most recent edition available in print.

Print books circulate for four weeks and can be renewed if not requested by others.

Print Nursing Journals, floor 3

The Yocum Library subscribes to some nursing journals in print. Current issues are displayed on floor 3 opposite the popular magazine display. Back

Print books holdings are found by using The [Yocum Library catalog](#) .

This catalog also contains the holdings of the Berks County Public Libraries.

College libraries have a collection of print books that are used just in the library. These books are called the “reference” or “research” collection. The Yocum Library research collection of health and nursing books are on floor 2 near the Research

Librarians’ offices.

In addition to print books, The Yocum Library has many e-books on health and nursing subjects in two collections — [Rittenhouse’s R2Library](#) and [EBSCOhost’s E-Books](#).

issues are shelved in boxes behind the popular magazine display. The Yocum Library holds five years of each title. Students may use print nursing

journals in the library only. Free scans of these journals can be made using the document scanning station on floor 2.

Online Journal Databases

Off-campus usernames & passwords are in CANVAS

ProQuest's Nursing & Allied Health Source

- Abstracting and indexing for 850+ titles, with 700+ full-text titles plus more than 12,000 full text dissertations in nursing and related fields.
