

Pharmacy Technician

Pharmacy technicians are an essential part of today's healthcare system, working alongside pharmacists to prepare and dispense medications and support patient care in both hospital and retail settings.

In this program, you'll learn the skills needed to succeed in the field, including pharmacy technology, medication distribution, pharmaceutical science, pharmacy calculations, and pharmacy law. You'll also gain practical knowledge of administrative processes used in real-world pharmacy environments.

If you enjoy working with people, have strong attention to detail, and are looking for a fast-paced healthcare career, this program can help you take the first step.

We're here to answer your questions and help you take the next step towards your healthcare career. Contact us for program start

dates, schedules, admission requirements, program-specific requirements and additional information.

Program Length: 18 weeks
