

Completing the Course Registration form:

Using the list of courses on page 1, identify the course section by confirming the name of your high school course and teacher. You will need the section number to complete your course registration form (excerpt below). For courses such as AP Biology and AP Chemistry, sign up for both fall and spring courses. For example, AP Biology is equal to two lab science courses at RACC, BIO 150-1509 and BIO 155-3509.

DANIEL BOONE COURSE NAME	INSTRUCTOR	RACC COURSE SECTION #	CREDITS	RACC COURSE NAME
Accounting	Mr. Moulin	ACC 105-1505	3	Financial Accounting
AP Biology	Ms. Bitler	BIO 150-1509	4	Biology I
		BIO 155-3509	4	Biology II

You will see two columns on the course registration form to write your course section numbers. Fall courses (left side) may be year-long courses and have "15" in the section number. Spring courses (right side) have a "35" in the section number (excerpt below). Use one course registration form for all the dual enrollment courses you intend to earn credit for the current academic year. If you attend Exeter, Twin Valley or Conrad Weiser, only register for fall courses because these schools also have a spring registration.
